

For Whom?

- Pharmaceutical companies who base their innovations on new molecules

What do you get?

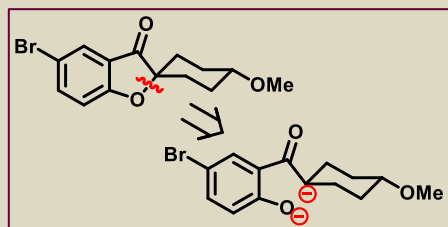

- New design possibilities based on novel reactions
- Virtual library of novel and accessible molecules
- ADME/PK-prediction, profiling and differentiation

When?

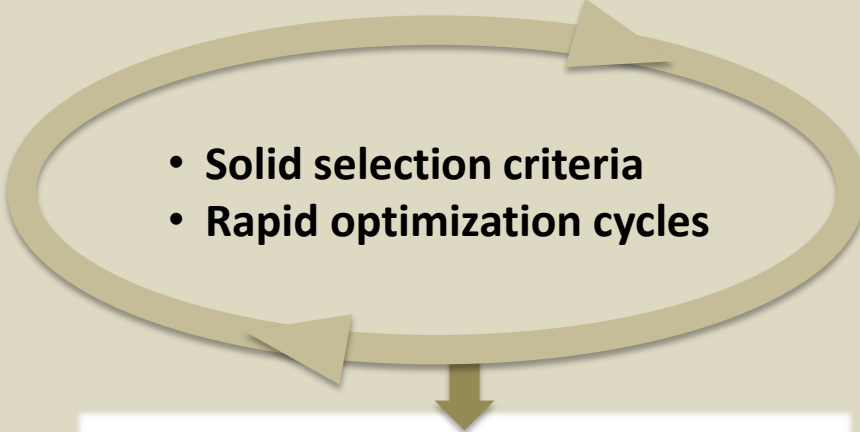

- Early stage projects
- Lead Optimization

Applications:

- Library design
- Scaffold modification
- SAR development

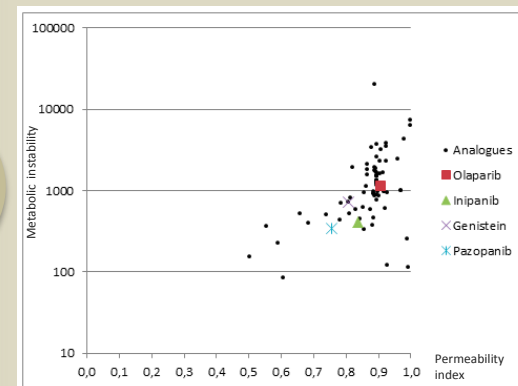

**Chemnotia identifies
unconventional chemistry**

- 
- Solid selection criteria
 - Rapid optimization cycles

The integrated service will give

- fast hypothesis validation
- resource and cost efficiency

**Prosilico predicts
ADME/PK**

Our background

Experience of medicinal chemistry, ADME/PK and process development from AstraZeneca R&D
Experts on modelling tools, including software for advanced synthesis design
